

# QX-S5824 10 Gigabit Ethernet Switch

### At a Glance

- Versatile Aggregation switches targeted for Enterprise networks
- In conjunction with QX-S5200 series (1G PoE access switch with 10G Ethernet up-links) and QX-S4100 and QX-S1000 series (1G PoE access switch with 1G Ethernet up-links) can be used to implement a complete Enterprise network
- Low cost/port make these switches ideal where high 10 throughput is required, as an example in HCl node aggregation
- Full featured L2 and L3 forwarding
- 24 x 10 Gigabit ports SFP+ and 2 x 40 Gigabit ports QSFP+
- Two slots for one or two (redundant) power supplies and two slots for fan trays
- · Two slots for expansion cards:
  - LSWM2QP2P: 2 x 40 Gbps QSFP+ fiber ports
  - LSWM4SP8P: 8 x 1/10 Gbps SFP+ fiber ports

#### **Overview**

NEC's QX-5824 10 Gigabit aggregation switches offer businesses the flexibility to easily connect multiple edge switches with 10 Gigabit up-links.

The two 40 Gigabit up-links offer high bandwidth in single or redundant configurations.

#### **Main Product Features**

- 24 10 Gigabit ports (SFP+) with two 40 Gbps up-links (QSFP+)
- Support for L2/L3 forwarding, QoS, Security, Multicast, & VLAN
- CLI and WebGUI management console

# **Specifications**
